

LABioMed
Los Angeles
Biomedical
Research Institute
at Harbor-UCLA Medical Center

Employment Opportunity Technology Transfer Consultant Compensation Commensurate with Experience

Position Summary

The Los Angeles Biomedical Research Institute at Harbor-UCLA Medical Center (LA BioMed) is an internationally acclaimed leader in biomedical research seeking a Technology Transfer Consultant. LA BioMed is one of the nation's largest independent, not-for-profit biomedical research organizations. The work environment is entrepreneurial, diverse and exciting. This position involves collaboration with the Director, New Business Ventures, Technology Management and Facilities to carry out the technology transfer function.

Job Responsibilities/Duties

- Identification and marketing of intellectual property developed at the Institute
- Negotiation of intellectual property licenses and related transactions
- Meeting with Institute research investigators to identify new inventions and discuss the status of research supporting patent and copyright applications
- Correspondence with patent attorneys to discuss the status of patent and copyright applications

Critical Skills

This position requires experience successfully marketing, negotiating and licensing intellectual property (patents, copyrights and trademarks). It requires experience working in a biomedical research environment and working effectively with research scientists to transfer technology based on biomedical research. The position requires resourcefulness and initiative to market and promote Institute inventions. It requires technical and business expertise and knowledge of the laws and regulations governing intellectual property. It requires strong communication skills, both oral and written. Successful candidates will have a successful track record of marketing, negotiating and licensing inventions generated through biomedical research.

This position requires a successful criminal conviction search for employment
