

Calando Pharmaceuticals

Chemist Research Associate

Calando Pharmaceuticals, a biotechnology company located in Pasadena, California, is seeking a synthetic organic chemist for the development of cyclodextrin derived biomaterials for drug delivery. Additionally, this position will also provide analytical support by developing and performing various assays. This position requires a bachelor degree in chemistry and 1-2 years of hands-on laboratory experience. Additional requirements are proficiency with HPLC and NMR (MS and GPC experience would be a plus). Research experience in the pharmaceutical or biotech industry is highly welcome. The ability to work in multidisciplinary teams, to independently execute syntheses and analytical assays, as well as good oral and written communication skills are a must.

Calando offers a highly competitive compensation and benefits package. Submit your CV and salary requirements to Claudia Alonso (calonso@calandopharma.com). Southern California residents are preferred. For more information about Calando Pharmaceuticals, Inc. please check our website at www.calandopharma.com
