Position: Senior Research Associate I/Technologist

Company: Cynvenio Biosystems, Inc.

www.cynvenio.com

Contact: careers@cynvenio.com

Location: Westwood, California

Cynvenio Biosystems is a start-up focused on advancing personalized medicine by developing high performance instruments and assays that support the R&D market in life sciences. Our proprietary instrumentation, sample handling, cell sorting, detection, and amplification technologies enables novel applications in stem cell & cancer research, as well as the discovery and validation of novel therapeutic solutions.

We are seeking a highly motivated and talented Senior Research Associate to implement protocols for the isolation and detection of rare cells from clinical samples. This position is based at the UCLA campus in Westwood.

Job Requirements:

- B.S or M.S. in Biochemistry, Biology or related disciplines
- Background or experience handling primary clinical samples, immunohistochemistry for FACS or fluorescent staining and fluorescent microscopy is preferred.
- Experience managing multiple patient samples, careful record keeping and database record a plus.
- An ability to work independently is a must. You will need to be comfortable working with minimal supervision.
- Excellent written and verbal communication skills

Our compensation package is competitive and dependent on your qualifications and experience. If you're an outstanding laboratory Technologist who would like to join a cutting edge team to change the world, we'd love to hear from you. Contact us at careers@cynvenio.com.
